

# How to make a pine cone bird feeder:

Birds need a little extra help over winter, give them a treat by making this easy pine cone bird feeder!

## Step 1:

Get the lard to room temperature by working it with your hands.

## Step 2:

Add the bird seed to the lard, and mix it thoroughly with a spoon or your hands.

## Step 3:

Tie the string to the top of the pine cone (this will be used to hang your bird feeder up later).

## Step 4:

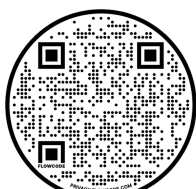

Put the lard and seed mixture around all of the pine cone. Make sure to get the mixture into crevices and cracks. Really pack the mixture onto the pine cone - it's easier to use your hands for this!

## Step 5:

Hang your finished pine cone out side for birds to enjoy over winter, and send us a picture.

**Send us a picture of your bird feeder!**
